SUMMARY

Flutter developer with hands-on experience building Android and iOS applications through real-world projects. Strong understanding of clean architecture, state management, and Firebase integration. Experienced in implementing authentication, real-time data, and offline-capable features. Focused on writing maintainable, scalable code and delivering reliable mobile solutions.

SKILLS

- Programming Languages: Dart(expert),Java,C++,SQL
- Framework: Flutter
- State Management: Provider
- Backend & Database: Firebase Authentication, Cloud Firestore
- APIs: REST API integration
- Architecture: MVVM, Clean Architecture (basic understanding)
- Tools & IDEs: Git, GitHub, Android Studio, VS Code
- Other Skills: Debugging, UI implementation, performance optimization

EXPERIENCE

Flutter Developer

Project-Based Experience | Remote

Jan 2024 - Aug 2025

- Designed and developed Flutter applications for Android and iOS as part of end-to-end project implementations.
- Implemented Firebase Authentication and Cloud Firestore for secure login and real-time data handling.
- Applied Provider-based state management and MVVM principles to maintain clean and scalable code.
- Integrated REST APIs and handled asynchronous data flow within the application.
- Focused on UI consistency, performance optimization, and bug fixing across multiple screens.

Flutter Developer

QPI Industry

Sep 2025 - Present | On-site

- Developing a Flutter-based asset management application for internal company use, supporting Android devices.
- Implementing barcode generation and scanning to efficiently track and manage company assets.
- Integrating Firebase Authentication for secure user login and role-based access.
- Using Cloud Firestore for real-time asset data storage and synchronization.

- Designing and implementing CRUD operations for asset records and maintenance status.
- Collaborating with company stakeholders to understand requirements and deliver functional features.

PROJECTS

Catalog UI App — Personal Project

Sep 2024 - Nov 2024

- Designed and implemented a clean and responsive catalog UI using Flutter.
- Focused on UI consistency, animations, and responsive layouts for multiple screen sizes.
- Practiced reusable widgets, theming, and performance optimization.

Real-time Chat App — Personal Project

Jan 2025 - Apr 2025

- Developed a real-time messaging application with Firebase backend.
- Implemented Firebase Authentication, Firestore database, and push notifications.
- Applied MVVM architecture and Provider for state management to ensure scalable and maintainable code.
- Focused on performance optimization and smooth UI/UX for chat screens.

Netflix Clone — Personal Project

May 2025 - Aug 2025

- Built a video streaming interface similar to Netflix using Flutter.
- Integrated REST APIs with GET and POST requests for fetching movie data.
- Implemented Provider for state management and MVVM architecture for maintainable code.
- Focused on dynamic content rendering, UI performance, and responsive design.

QPI Asset Management System — Company Project

Dec 2025 - Present

- Developing a Flutter-based asset management application for internal company use, supporting Android devices.
- Implementing barcode generation and scanning to efficiently track and manage company assets.
- Integrating Firebase Authentication for secure user login and role-based access.
- Using Cloud Firestore for real-time asset data storage and synchronization.
- Designing and implementing CRUD operations for asset records and maintenance status.
- Collaborating with company stakeholders to understand requirements and deliver functional features.

EDUCATION

Bachelor of Science in Software Engineering — Kohat University.
